

San Francisco Hep B Free Clinician's Honor Roll

The SF Department of Public Health estimates there are 1,500 clinicians providing primary health care in San Francisco. The goal of SF Hep B Free is to have 90% join the honor roll by signing a pledge to comply with the U.S. Centers for Disease Control and Prevention screening guidelines. In 2009, the SF Hep B Free Clinicians Honor Roll program began with 702 clinicians. Since then, 263 additional clinicians have joined, for a grand total of 965.
